MANT – Procedure for Drug and Alcohol Testing

General

- Drug and alcohol testing may take place at any permitted event.
- Testing will be conducted by an accredited and suitably qualified person.
- Any person appointed to conduct drug testing is considered an official to the event.
- Selection of candidates for testing will be by random selection unless any key official determines to nominate a candidate for direct testing. Nomination requires no evidence or reason.
- This policy is for the guidance of the *Steward* and *Clerk of Course* at any permitted event.

Test Results

- With respect to alcohol.
 - *Alcohol is found to be present*: Immediate removal from the event (with or without refund).
 - *Alcohol is not found to be present*: Participation continues.
- With respect to other drugs
 - *No results/negative result*: The person tested without result continues to participate in the event.
 - *Non negative result*: A non-negative result will be laboratory tested.
 - In the meantime the non-negative result indicates reasonable grounds to believe that drugs are present in the individual and that the presence of drugs possesses an unacceptable risk to themselves and other participants.
 - The person returning a non-negative will be removed from the event (with or without refund).

Approved by the Executive Manager/President
